

Post-doctoral Research Associate position in Nuclear Theory

The Nuclear Theory Group at Brookhaven National Laboratory is looking for a post-doctoral Research Associate to work on theoretical nuclear physics, starting on October 1, 2014 for a period of two years. Research activities in the group include research on perturbative QCD and spin physics, QCD at high energies, temperatures and densities, on heavy ion phenomenology in support of the experimental program at RHIC and the LHC, and research in support of future facilities in Nuclear Physics. Applicants should have a Ph.D. in nuclear or particle physics which they received within the past five years.

Applications received by December 15th will receive full consideration. All applicants should fill out the application at the official BNL web site, <http://jobs.bnl.gov>, Job ID 16557. In addition, they should sent all materials, including a Curriculum vitae, a statement of research interests, and at least three letters of recommendation, by email to the secretary for the Nuclear Theory group, Marcy Chaloupka, at marcy@bnl.gov.

BNL is an Affirmative Action/Equal Opportunity Employer committed to the development of a diverse workforce.
